## IB MAPPING

Our books fully support all areas of the UK curriculum, but we don't stop there. We have mapped every title to the International Baccalaureate too - our books travel all over the world, so we make sure they work wherever you are. All IB information has been drawn from the IB website at [www.ibo.org](http://www.ibo.org). We recommend our titles for the IB PYP programme, and you can find this information at the bottom of every page, tracked to outcomes for International-Mindedness, the Six Trans-Disciplinary Themes, and the Six Subject areas. We are not endorsed by IBO in any way.

### IB Curriculum Reference Key:

International Mindedness

Six Trans-Disciplinary Themes

## BOOK BAND LEVELS

Book Band levels offer a graduated literacy scheme that helps teachers to assess their pupils' reading abilities.

All our titles have been assessed and graded by Book Band specialists from the very simplest format at band lilac, to the highest ability titles at band black.

|           |           |
|-----------|-----------|
| Lilac     | Purple    |
| Pink      | Gold      |
| Red       | White     |
| Yellow    | Lime      |
| Blue      | Brown     |
| Green     | Grey      |
| Orange    | Dark Blue |
| Turquoise | Burgundy  |
|           | Black     |

to discuss availability.

We strive to produce the books that fill the gaps on your library shelves.

All our titles draw from the UK National Curriculum, and we've referenced them to the International Baccalaureate (IB) too. We're also proud to work with external experts and agencies. Place2Be, Médecins sans Frontières and Greenpeace have lent their names and expertise to our titles in the past year.

WE ARE EXTREMELY PROUD TO ANNOUNCE THAT BOOKLIFE ARE HEADLINE SPONSORS OF THE ONLY CHILDREN'S BOOK AWARD VOTED FOR BY CHILDREN.

PROUDLY SPONSORING

# BookLife PUBLISHING

**BookLife Publishing was born from a simple idea: putting children at the heart of our books.**

That's why our books are so unique – from *Pigs Might Fly* (p.80) to *Why Do I Poo?* (p.62), we're always looking for a new angle that children all over the world will love. Our unique, award-winning style and creative approach to non-fiction means our books are never dry – and they always make a splash!

We're always pushing our creativity to make the next best book ever – unlocking imaginations, creativity and critical thinking in everything we do. From reluctant readers to the most dedicated bookworms, we believe there is a book out there for every child – and if there isn't yet, then we'll make it!

**As a rapidly-growing independent publisher, we value feedback from industry, but it's always the children's opinions that matter the most.**

It's a global marketplace, and educational professionals around the world agree that books for children are of the utmost importance in an increasingly digital world. We're proud to see our books heading off to China, India, the USA and all around the world, and we've been printed in several different languages, so we make sure

our books are relevant in many cultural contexts, exploring worldwide cultures and perspectives as well as subjects closer to home. Our new catalogue is packed with hundreds of our latest titles, covering all the main curriculum areas. Come see us on Twitter and Facebook and tell us which are your favourites. **Happy reading!**

**Children all across the world read our books!**

**Our highly-qualified and dedicated team includes teachers, authors, and educational experts.**

# LET'S GET DISGUSTING!

From **SMELLY** poos to dribbly goos, **BLOODY** squirts to growing spurts: bodies are **AMAZING** – and **DISGUSTING**! Have you ever wondered how a pizza becomes a **POO**? What turns bogies **BLACK**? Why do you need to trim your **TOENAILS**? Find out about farts, hearts and itchy parts in this weird and wonderful look at the body's super systems.

**FEATURED SERIES**  
£12.99 Gold

# EXPLORING SCIENCE

## FIRST SCIENCE

Introduce young learners into the world of science with this fascinating series. These titles explore the scientific wonders of light, sound, magnets and the motions of pushes and pulls. With a simple approach and easy-to-understand diagrams, readers will discover the basics of everyday science with ease.

## STEM IN OUR WORLD

Can you imagine going on a trip into space? What about flying along at 300 miles an hour in a levitating train? Or clinging onto your seat at a 4D movie? Thanks to STEM, soon you can do all this and more! Science, technology, engineering and maths are bringing new toys, tools and technological gadgets into our everyday lives. Come and meet Professor Tess Tube, and join her STEM School, where you will learn about the amazing gadgets and gizmos that are all around us. STEM in Our World is an exciting and engaging series looking at new and future technologies. Combining current science with futuristic imagination, this informative series aims to reach out to the engineers and inventors of tomorrow with STEM subjects today.

# WORKING SCIENTIFICALLY

# SUPERNATURAL SCIENCE

Are flashing lights and flying objects taking over the skies above your town? Does your older brother smell even more like the undead than usual? Are you worried that your house could be haunted? And, most importantly, are you feeling brave? This guide contains everything you'll need to know to investigate the science behind the supernatural.

WHAT LIVING THINGS EAT

Whether your breakfast is plants or meat, all living things have to eat! One feature of living things is their need for food. From meat-eating predators and plant-picking herbivores to all-consuming omnivores and even living things which take nutrients from light and soil, this series looks at the different foods living things need to survive.

Carnivores

# ME AND MY PET

Me and My Pet introduces children to some common household pets (as well as some less common ones) and guides them through the process of acquiring, loving and taking care of an animal. By teaching children all about the animals they might keep as pets, these handy guides foster a sense of independence and responsibility that will greatly benefit them in the future.

# TINY THINGS, BIG IMPACTS

Zoom in on the tiny things in life with this big book of little creatures. Brilliant bees, super spiders, perfect plankton and wriggly worms might seem small, but they have a huge impact on the world as we know it. These pint-sized planet protectors give us food, make our medicine and save our seas – not to mention parachutes and bulletproof vests! Find out how in this brilliant new series.

# UNDER THE MICROSCOPE

Look a little closer...  
This exciting series zooms in on the little things in life. Peek through the microscope and take a look at the tiny things all around us: the amazing little lives of bacteria and viruses, fungi and parasites.

How many bacteria are there on a human hand? What viruses can be found on a mobile phone? And what is living in your eyelashes? Not for the faint-hearted, this series looks at little critters we all live with, and can't live without.

# LIFE-SAVING SCIENCE

This series explores science that saves lives. We take a look at the discovery and development of important technologies such as scans and vaccinations, and explore the impact on survival rates as a result. Taking a look at the diseases and illnesses treated by these marvels of medicine, we explore case studies and find out how discoveries such as antibiotics and anaesthetics changed medicine forever.

# ELEMENTAL EARTH

Our planet is ruled by four elements: earth, air, fire and water. Mountains rumble, hurricanes whirl, wildfires eat up the landscape, and tsunamis sweep away cities – nothing is safe from the elements. This series teaches readers all about Earth's destructive elements and the ways in which we harness them.

# COMPUTERS & CODING

## COMPUTERS AND CODING

Could you program a toaster? Make a phone call on a watch? Stop a thief from stealing your identity? With computers, we can do all this and more. Learn about our digital lives, from staying safe online to understanding a computer's languages, and discover how computers store and use our information in Computers and Coding. This series uses engaging imagery and simple information to engage young readers with the digital skills they need to live and learn in a virtual world.

### How Computers Work

HEALTHY MINDS

These beautifully illustrated titles look at our emotions through a series of original stories. With a blend of full-colour photography and original illustrations, these books take us on a journey through some common mental health issues, and show us what it's like when an anxious rabbit won't leave you alone, or a jumpy monkey won't let you concentrate. Readers can learn about the effects of living with certain conditions and explore coping strategies in an interesting and creative way, through stories, facts and pictures in these inventive and accessible titles.

Developed with support from leading children's mental health professionals and key workers.

# CHARITY & GIVING

This factual series has been developed with direct input from some of the world's major charities to introduce young readers to charity, giving and fundraising. We take a look at why charities exist, who and what they support, and how they raise money, and we give young activists ideas on how to get involved and support their favourite charities. This interesting series helps young readers engage with the wider world and consider far-reaching topics from a charitable perspective.

# WORLD CHARITIES

Developed with direct input from some of the world's major charities, these eye-catching titles introduce the purpose and work of some of the most famous charitable groups on the planet. On topics such as the environment, animal conservation and humanitarian work, we have worked to look in-depth at the history, mission statements and valuable work of activists, workers, educators and volunteers saving and changing lives around the world today. Young readers can learn how to get involved, from starting conversations to raising money and awareness of these incredible organisations.

# LIFE EVENTS

## TOPICS TO TALK ABOUT

These charming scrapbook-style titles take topics affecting children's lives today, and lets the kids themselves do the talking. Topics To Talk About introduces the reader to some young characters, and discusses what makes them unique in a friendly, accessible way.

# MAPS AND MAPPING

Not just for directions, maps are used to track and study weather, people, money and more. In this fascinating series, human and physical geography combines with technology and science to look at how we map the world around us, and our lives within it.

FOREST EXPLORER

Let's take a trip into the woods to see what we can see; there's bugs and birds and animals all living in a tree. Fuzzy moss and splashy streams; mud and sticks and stones... underneath a rotting log, the mushrooms make their home. So pick up your binoculars and won't you come with me: let's all explore the forest – we'll be home in time for tea!

# HUMAN HABITATS

Human habitats are found all over the planet. From the sweltering Sahara to the freezing Arctic tundra, we can survive in the toughest, most unforgiving habitats. This series explores all the ways humans adapt to their environments and use the habitats around them to survive. Humans don't let nature come to us; we go to it.
