IB MAPPING

Our books fully support all areas of the UK curriculum, but we don't stop there. We have mapped every title to the International Baccalaureate too – our books travel all over the world, so we make sure they work wherever you are. All IB information has been drawn from the IB website at www.ibo.org. We recommend our titles for the IB PYP programme, and you can find this information at the bottom of every page, tracked to outcomes for International-Mindedness, the Six Trans-Disciplinary Themes, and the Six Subject areas. We are not endorsed by IBO in any way.

IB Curriculum Reference Key:

- International Mindedness
- Six Trans-Disciplinary Themes
- Six Subject Areas

BOOK BAND LEVELS

Book Band levels offer a graduated literacy scheme that helps teachers to assess their pupils' reading abilities.

All our titles have been assessed and graded by Book Band specialists from the very simplest format at band lilac, to the highest ability titles at band black.

- Lilac
- Pink
- Red
- Yellow
- Blue
- Green
- Orange
- Turquoise
- Purple
- Gold
- White
- Lime
- Brown
- Grey
- Dark Blue
- Burgundy

RIGHTS Please contact andrew@mms-publishing.com or maxine@booklife.co.uk to discuss availability.

We strive to produce the books that fill the gaps on your library shelves. All our titles draw from the UK National Curriculum, and we've referenced them to the International Baccalaureate (IB) too. We're also proud to work with external experts and agencies. Place2Be, Médecins sans Frontières and Greenpeace have lent their names and expertise to our titles in the past year.

BookLife PUBLISHING

BookLife Publishing was born from a simple idea: putting children at the heart of our books.

That's why our books are so unique – from Pigs Might Fly (p.106) to Why Do I Poo? (p.82), we're always looking for a new angle that children all over the world will love. Our unique, award-winning style and creative approach to non-fiction means our books are never dry – and they always make a splash!

We're always pushing our creativity to make the next best book ever – unlocking imaginations, creativity and critical thinking in everything we do. From reluctant readers to the most dedicated bookworms, we believe there is a book out there for every child – and if there isn't yet, then we'll make it!

As a rapidly-growing independent publisher, we value feedback from industry, but it's always the children's opinions that matter the most.

GO TO WWW.BOOKLIFEPUBLISHING.CO.UK TO KEEP UP TO DATE ON WHAT WE ARE WORKING ON NEXT!

It's a global marketplace, and educational professionals around the world agree that books for children are of the utmost importance in an increasingly digital world. We're proud to see our books heading off to China, India, the USA and many other countries around the world, and we've been printed in several different languages, too.

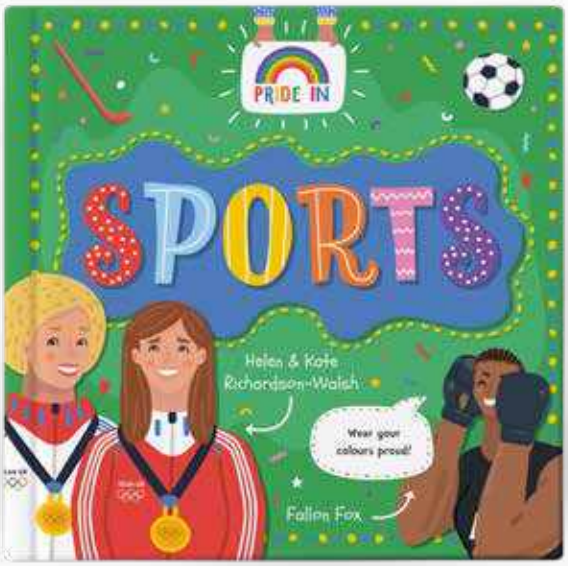
We make sure our books are relevant in many cultural contexts, exploring worldwide cultures and perspectives as well as subjects closer to home. Our new catalogue is packed with hundreds of our latest titles, covering all the main curriculum areas. Come and find us on Twitter and Facebook and tell us which are your favourites. **Happy reading!**

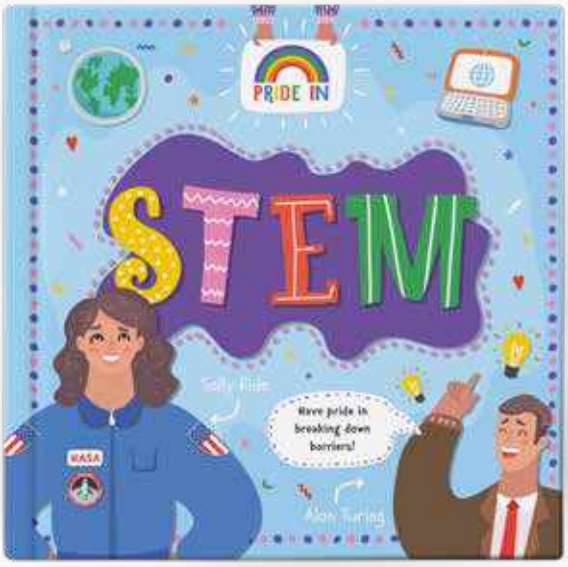
Children all across the world read our books!

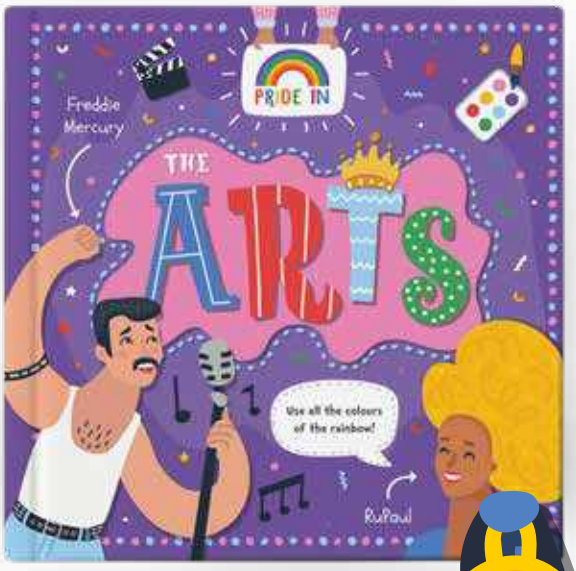
Our highly-qualified and dedicated team includes teachers, authors, and educational experts.

Be Proud of Who You Are

Sometimes being who you are can be a hard thing to do. Learn about people from across the LGBTQIA+ community who celebrate who they are and never stop fighting for what they believe in. No matter who you are, inside or out, this book is here to teach you that you can be proud of who you are.







Celebrate who you are on page 149

FEATURED SERIES

Brown £12.99

Author: Emilie Dufresne

LET'S GET PAINTING

Join your specialist as you find out all about different art genres, famous artists and their works and then try to recreate your own versions of these works. This series will give your mini Monets and diddy Dalís all the knowledge they need about the history and practice of art.

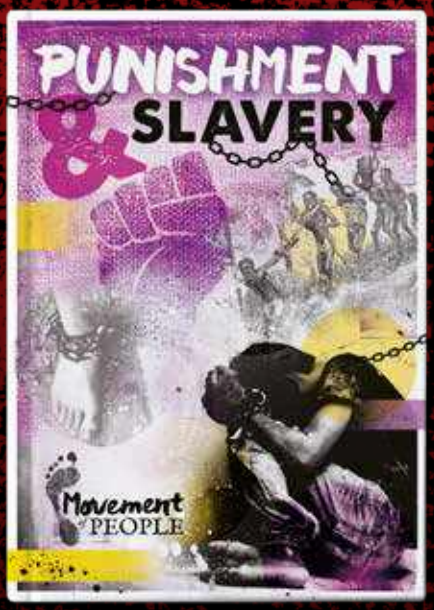
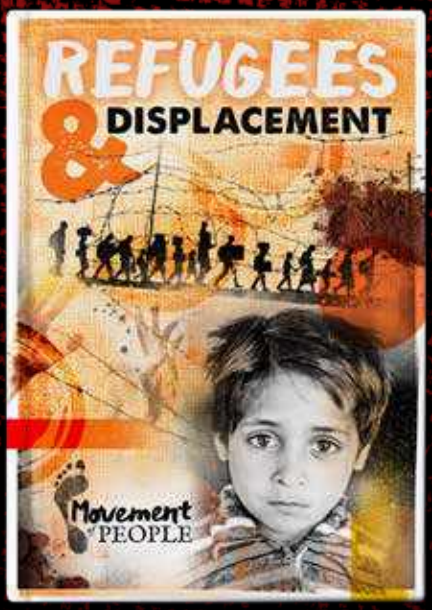
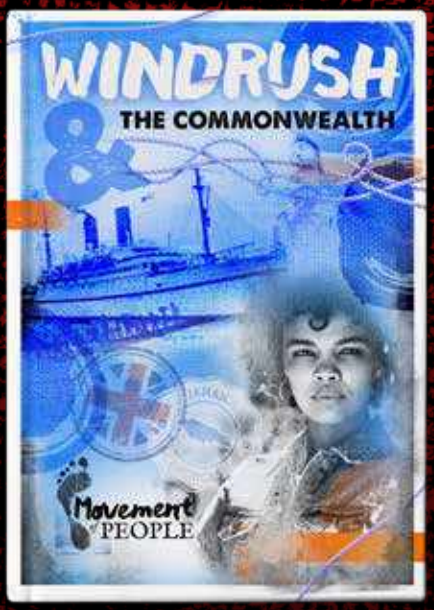
HOW HAS THE MOVEMENT OF PEOPLE SHAPED THE WORLD AROUND YOU?

Have you ever wondered how the movement of people has shaped the world around you? People have always moved around the world, whether to build a new home or flee from a natural disaster. Without the movement of people, the world would be a very different place.







THE JOURNEY OF THE

HMT EMPIRE WINDRUSH

In 1948, the HMT Empire Windrush ship set sail from the Caribbean and made its way across the Atlantic for Britain. The Windrush stopped at different countries in the Caribbean and picked up men, women and children.

IT TOOK 22 DAYS FOR THE WINDRUSH TO SAIL FROM JAMAICA TO BRITAIN.

BRITAIN
BERMUDA
CUBA
MÉXICO
TRINIDAD
JAMAICA

To the Motherland

Some passengers on board were excited to reach Britain, or the 'motherland'. As Jamaica, Trinidad and Tobago are Commonwealth countries, many citizens were taught to think about Britain as their 'mother country'.

IT COST AROUND £29 TO TRAVEL ON THE WINDRUSH. THIS IS ABOUT £1000 TODAY.

On Board the Windrush

There were 684 men, 257 women and 86 children on board the Windrush. Not all of the passengers were from the Caribbean. Some of the passengers on board were Polish nationals who were **displaced** after World War Two.

Some of the passengers on board had fought for Britain during World War Two, and were excited to return to the land that they considered home. Many of the passengers on board were skilled workers. Some were hairdressers, mechanics and there was even a **barrister** on board!

Track movements across the world page **193**

EXPLORING SCIENCE

FIRST SCIENCE

Introduce young learners into the world of science with this fascinating series. These titles explore the scientific wonders of light, sound, magnets and the motions of pushes and pulls. With a simple approach and easy-to-understand diagrams, readers will discover the basics of everyday science with ease.

STEM IN OUR WORLD

Can you imagine going on a trip into space? What about flying along at 300 miles an hour in a levitating train? Or clinging onto your seat at a 4D movie? Thanks to STEM, soon you can do all this and more! Science, technology, engineering and maths are bringing new toys, tools and technological gadgets into our everyday lives. Come and meet Professor Tess Tube, and join her STEM School, where you will learn about the amazing gadgets and gizmos that are all around us. STEM in Our World is an exciting and engaging series looking at new and future technologies. Combining current science with futuristic imagination, this informative series aims to reach out to the engineers and inventors of tomorrow with STEM subjects today.

SILLY SCIENCE FOR SMART KIDS

Science is smart, right? Science helps people understand important but boring things, right? Well, sometimes very smart people answer very stupid questions with very strange science. So if you have ever wondered what would happen if you started to cry in space, or if you ran on a sea of custard, then this is the series for you.

ONCE UPON A STEM

Has anyone told you the story of the Three Little Pigs? With a big bad wolf who blows houses down? But what would a scientist say about a wolf blowing down a house? You are about to find out, because Professor Everafter is here, and he is going to put this fairy tale under the microscope.

WORKING SCIENTIFICALLY

SUPERNATURAL SCIENCE

Are flashing lights and flying objects taking over the skies above your town? Does your older brother smell even more like the undead than usual? Are you worried that your house could be haunted? And, most importantly, are you feeling brave? This guide contains everything you'll need to know to investigate the science behind the supernatural.

THE MUSEUM OF PHOBIAS

The museum of phobias is always open. Will you find your phobia lurking in its corridors? Learn the science behind why we get scared, but be careful – only the bravest can make it to the end of the book. Come and see the entomophobia exhibit on the 2nd floor – it has 200 types of insect. Check out the thalassophobia exhibit in the basement – you'll find out what that means when you get there…

A WORLD WITHOUT

NEW SERIES PUBLISHED 2020

What could you live without? You could live without chocolate or TV, right? Those things are easy to lose. But what about a world without any sunlight or rain falling from the skies? Could you live in a world where plants or animals had disappeared? Discover what it would be like to live in a world without the most important parts of everyday life in this weird and wonderful series.

WHAT LIVING THINGS EAT

Whether your breakfast is plants or meat, all living things have to eat! One feature of living things is their need for food. From meat-eating predators and plant-picking herbivores to all-consuming omnivores and even living things which take nutrients from light and soil, this series looks at the different foods living things need to survive.

ME AND MY PET

Me and My Pet introduces children to some common household pets (as well as some less common ones) and guides them through the process of acquiring, loving and taking care of an animal. By teaching children all about the animals they might keep as pets, these handy guides foster a sense of independence and responsibility that will greatly benefit them in the future.

TINY THINGS, BIG IMPACTS

Zoom in on the tiny things in life with this big book of little creatures. Brilliant bees, super spiders, perfect plankton and wriggly worms might seem small, but they have a huge impact on the world as we know it. These pint-sized planet protectors give us food, make our medicine and save our seas – not to mention parachutes and bulletproof vests! Find out how in this brilliant new series.

UNDER THE MICROSCOPE

Look a little closer…
This exciting series zooms in on the little things in life. Peek through the microscope and take a look at the tiny things all around us: the amazing little lives of bacteria and viruses, fungi and parasites.
How many bacteria are there on a human hand? What viruses can be found on a mobile phone? And what is living in your eyelashes? Not for the faint-hearted, this series looks at little critters we all live with, and can't live without.

LIFE-SAVING SCIENCE

This series explores science that saves lives. We take a look at the discovery and development of important technologies such as scans and vaccinations, and explore the impact on survival rates as a result. Taking a look at the diseases and illnesses treated by these marvels of medicine, we explore case studies and find out how discoveries such as antibiotics and anaesthetics changed medicine forever.

FUEL UP!

What do you do if you are hungry? You eat something of course! We all quench our thirst with a drink and go to sleep when we are tired. Our bodies need all sorts of fuel in order to work and be at their best. But why does this happen? And what happens if we don't get everything that we need? Get ready to fuel up and learn all about the fuel we need.

ELEMENTAL EARTH

Our planet is ruled by four elements: earth, air, fire and water. Mountains rumble, hurricanes whirl, wildfires eat up the landscape, and tsunamis sweep away cities – nothing is safe from the elements. This series teaches readers all about Earth's destructive elements and the ways in which we harness them.

COMPUTERS & CODING

COMPUTERS AND CODING

Could you program a toaster? Make a phone call on a watch? Stop a thief from stealing your identity? With computers, we can do all this and more. Learn about our digital lives, from staying safe online to understanding a computer's languages, and discover how computers store and use our information in Computers and Coding. This series uses engaging imagery and simple information to engage young readers with the digital skills they need to live and learn in a virtual world.

MENTAL HEALTH & WELLBEING

A KID'S GUIDE TO FEELINGS

Help your little heroes identify, understand and tackle their emotions with this exciting and engaging series. A Kid's Guide to Feelings asks why we have different emotions, and uses a bright and exciting comic-book style to bring this to life.

HEALTHY MINDS

These beautifully illustrated titles look at our emotions through a series of original stories. With a blend of full-colour photography and original illustrations, these books take us on a journey through some common mental health issues, and show us what it's like when an anxious rabbit won't leave you alone, or a jumpy monkey won't let you concentrate. Readers can learn about the effects of living with certain conditions and explore coping strategies in an interesting and creative way, through stories, facts and pictures in these inventive and accessible titles.

Developed with support from leading children's mental health professionals and key workers.

A DIFFERENT WORLD

We all share the same world, but do we experience it in the same way? A Different World gives children the opportunity to see the world through others' eyes. Readers will understand what challenges other people face on a daily basis and be provided with the tools that will allow them to challenge their own assumptions about the world.

CHARITY & GIVING

This factual series has been developed with direct input from some of the world's major charities to introduce young readers to charity, giving and fundraising. We take a look at why charities exist, who and what they support, and how they raise money, and we give young activists ideas on how to get involved and support their favourite charities. This interesting series helps young readers engage with the wider world and consider far-reaching topics from a charitable perspective.

WORLD CHARITIES

Developed with direct input from some of the world's major charities, these eye-catching titles introduce the purpose and work of some of the most famous charitable groups on the planet. On topics such as the environment, animal conservation and humanitarian work, we have worked to look in-depth at the history, mission statements and valuable work of activists, workers, educators and volunteers saving and changing lives around the world today. Young readers can learn how to get involved, from starting conversations to raising money and awareness of these incredible organisations.

HOW TO BE AN EARTHLING

Meet Bo and Zop, two scouts from the Omega Quadrant, on a mission to monitor Earth! Their job is to find out all about us Earthlings, to see if we are friendly enough for a visit from the aliens of Omegatron. However, Bo doesn't seem to understand us at all! Can Zop show Bo what it means to be an Earthling? Explore PSHE themes in a fun and interesting way with this lively series.

GO EXPLORING! CONTINENTS AND OCEANS

Explore the world's seven continents and five oceans in this fantastic, globetrotting series. Each book discovers one of the world's continents and its surrounding oceans via detailed maps, engaging imagery and age-appropriate text. Readers will be able to identify the location, countries, landscape, climate and wildlife of each continent.

PHYSICAL & HUMAN GEOGRAPHY

The books in this series examine our planet's most destructive geographical events and look in detail at the causes and effects of these natural disasters. Combining clear illustrations and informative text designed for those beginning to read on their own, these books provide an intriguing insight into the natural processes that shape our world.

FOREST EXPLORER

Let's take a trip into the woods to see what we can see; there's bugs and birds and animals all living in a tree. Fuzzy moss and splashy streams; mud and sticks and stones… underneath a rotting log, the mushrooms make their home. So pick up your binoculars and won't you come with me: let's all explore the forest – we'll be home in time for tea!

HUMAN HABITATS

Human habitats are found all over the planet. From the sweltering Sahara to the freezing Arctic tundra, we can survive in the toughest, most unforgiving habitats. This series explores all the ways humans adapt to their environments and use the habitats around them to survive. Humans don't let nature come to us; we go to it.

A WORLD IN DANGER

Climate change is important. Climate change is dangerous. But what is it, and what does it look like? This innovative series will show you the ways in which the world is getting hotter, drier, wetter and windier. With real-world examples and practical eco-tips, these titles will show you exactly what is happening to our environment and how we can stop it.

DISASTROUS DEATHS

NEW SERIES PUBLISHED 2020

If you've been looking for a compilation of stupid, comical deaths from throughout history, look no further. Disastrous Deaths is the set of books for you. Find out just how these unfortunate people met their sorry ends… Were they taken out by an awful accident? Maybe they had a run-in with some atrocious animals. Were they foiled by their own blundering bodies? Perhaps some frightful food was the reason for their demise. No matter the cause of death, you'll be left hoping that you don't go the same way...

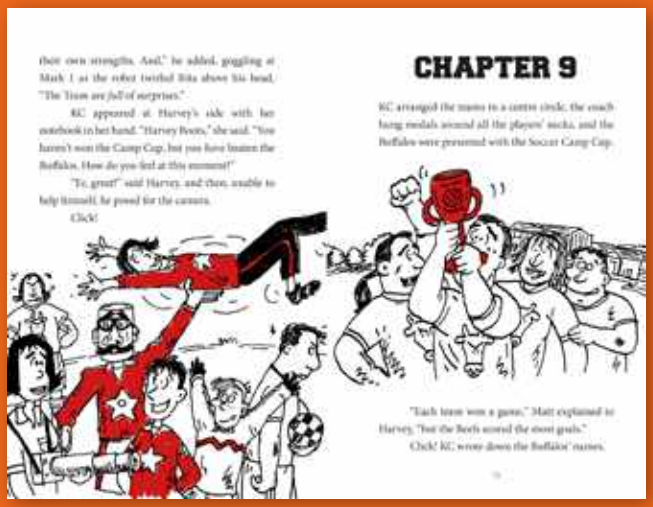
"He's a bit cranky," said Harvey.
Professor Gertie took an inhaler from the pocket of her lab coat and oiled the Football Machine's joints.

"His body is metal," she explained, "and he's covered from head to foot with Squidgy Skin. Bouncing Boots are built in and he has a top speed of sixty kilometres an hour. These are Skidders, for braking. And this is a Spinner, for turning."

As the Football Machine demonstrated the Spinner, Harvey asked, "What's his name?"
"I call him Football Machine Mark 1," said Professor Gertie. "Mark 1 means that he's the first of his kind — number one."
"I'll call him Mark 1," Harvey decided.



their own strengths. And," he added, goggling at Mark 1 as the robot twirled Rita above his head, "The Team are full of surprises."
KC appeared at Harvey's side with her notebook in her hand. "Harvey Boots," she said. "You haven't won the Camp Cup, but you have beaten the Buffalos. How do you feel at this moment?"
"Er, great!" said Harvey, and then, unable to help himself, he posed for the camera.
Click!

CHAPTER 9

KC arranged the teams in a centre circle, the coach hung medals around all the players' necks, and the Buffalos were presented with the Soccer Camp Cup.

"Each team won a game," Matt explained to Harvey, "but the Reds scored the most goals."
Click! KC wrote down the Buffalos' names.

KUNG-FU PIGS

Meet the Kung-Fu pigs – Rinki, master of the sword; Dinki, skilled with a fighting staff; and Stinki, deadly with a bow. These fearless warriors are always ready to protect the people from evil. Join them as they defend Emperor Ping-Pong from vampire squirrels, throw rice at temple ghosts and fight the evil general Gung-Ho. These brave pigs will always answer the call of the gong.

THE BIG PICTURE

Human beings are capable of incredible things. From light bulbs to literature, exploration to equality, the list of great humans and their achievements is huge. We have seen inside our bodies and outside our atmosphere, discovered forces and far-off lands, and littered the landscape with beautiful buildings. Find out how we built from the ground up and looked down from the stars in this inspirational series: it's all part of The Big Picture.
