

Have you ever wondered how we have so many amazing inventions? Many inventions just started out as an idea. This series explores some of the most important inventions throughout history and takes a look at the brilliant people whose big ideas gave us lots of the things that we take for granted today.

- Historical photographs enhanced by vector illustrations of figures from the past in relevant environments
- Levelled language suitable for curious young readers
- Informative and inspiring
- Interesting accompaniment to lessons about the past and human innovation
- Focused on stand-out historical characters from a variety of backgrounds and fields and their impact on the world
