

MY FIRST PICTURE ATLAS

SKU: POFA01 | Published: August 2025

MY FIRST PICTURE ATLAS

This beautifully illustrated atlas is packed full of fascinating data. A brief look at the solar system, our own planet, climate zones and geology is followed by informative maps.

Political maps showing all the independent countries within a continent, geographical maps indicating the locations of mountains, deserts, rivers, lakes and oceans, and regional maps marking not only all the important cities but also the animals, plants, crops, industries and natural resources particular to each region.

The atlas is also crammed with fact files highlighting unique characteristics of each continent and feature boxes which look at unusual or interesting plants and animals or put the focus on local fairs or festivals, all illustrated in colour.
