- Eye-catching illustrations and diagrams
- Perfect for home or classroom

The technology that drives our world today will not be the same in fifty or a hundred years. Delve into the possibilities that will make life on Earth and beyond completely different in the future.

STEM stands for science, technology, engineering and mathematics, and it is not just for scientists. The concepts we learn by studying STEM subjects can explain the existence of the whole Universe, including us and our daily lives. In this series, you will find out how easy STEM is to understand, and also discover how you can see it in action every second of every day.
