Humans share up to 98% of our DNA with gorillas, but those few percent make a big difference! Discover how we are almost the same, and how much gorillas differ from every other primate, including us.

KEY SELLING POINTS

- High-interest topics and visual appeal help build reading confidence
- Reinforces learning about habitats, adaptations and animal classification
- Inspires kids to care about animals and the natural world

Dive into the incredible world of animals in this exciting series for young readers! Each book explores the unique features, habitats, and behaviors of some of the most fascinating creatures on Earth. From the deep oceans to the lush jungles, children will discover the wonders of the animal kingdom in easy-to-understand language, paired with stunning images. Perfect for budding naturalists, this series sparks curiosity and brings the beauty of wildlife right to the page.
