32 pages

SUBJECT AREA:

Geography, Habitats, Biomes

AGE:

9+

THEMA:

YQG, YPMP7

CMBC:

D5N79

RIGHTS AVAILABLE : World ex Au & US

Fresh water is not a limitless resource. It is rare, making up only 1% of all the available water on Earth, but all the billions of land animals, including humans, need fresh water to survive. How is human activity affecting this important resource?

KEY SELLING POINTS

- Easy-to-understand language
- Enticing fact boxes
- Created for teachers and students
- Images and infographics that extend the text information
- Addresses the effects of climate change
- Perfect resources for finding out about landscapes, the water cycle, animal habitats and adaptations

Dividing the Earth up by its biomes is one way of making sense of the different landscapes we see. A biome is a large region of the Earth with its own climate, landscape, plants, soils, animals and water systems, all of which interact to create the biome's features. Find out how each biome is unique, and what effects humans are having on them.
